THE BURN STORY GROWS WITH THE REALM

Red Realm mint activity and Weekly Cup settlements send SHIBCAT out of active circulation, with live totals displayed across the ecosystem.

3,333 IDENTITIES. one LEGENDARY REALM.

Every Red Realm collectible keeps the SHIBCAT canon alive: one orange-and-cream cat, powerful Realm Red art direction, a unique Realm Mark, curated traits, and a declared rarity tier. No two identities are the same.

PUBLIC MINT CURVE

Starts at \$1.00 + \$0.25 per confirmed mint

The price moves only after a successful mint. Before every purchase, the mint screen refreshes the current SHIBCAT and RH ETH amounts.

SURPRISE REVEAL

Your identity is selected from the ready collection and revealed after confirmation in a full showcase card with its image, rarity, and traits.

BURN-POWERED MINT

Mint with SHIBCAT or RH ETH. Supported payments complete through a SHIBCAT burn that adds to the Realm's public burn total.

CURATED RARITY

Common, Uncommon, Rare, Epic, Legendary, and Mythic tiers create the chase. Diamond and precious-metal bodies are among the hardest pulls.

MADE TO LAST

Approved artwork and metadata are preserved on IPFS, while ownership lives on Robinhood Chain.

THE NEXT COLLECTOR CHAPTER

Fixed-price listings, offers, timed auctions, collector analytics, rarity discovery, and portfolio views are coming to the first-party Red Realm marketplace. A 5% marketplace royalty is designed to support more SHIBCAT burn activity.

07 / LITTER BOX WALLET

Every signed-in account receives one Robinhood Chain wallet address that connects the ecosystem. Check SHIBCAT and RH ETH balances, copy or scan your receive address, send supported assets, review activity, swap, enter the Weekly Cup, and fund a Red Realm mint without leaving the SHIBCAT world.

One account, one wallet, and a direct path between the token, the game, and the Red Realm.
